EXPERIENCE

Freelance

Jun 2023 - Present

Web Developer & Graphic Designer | Remote

- Developed and maintained various web-based solutions for clients, ranging from automation platforms to enterprise-level business websites.
- Designed responsive landing pages and supporting digital assets to strengthen branding and increase conversion rates.
- Collaborated directly with clients throughout the full Software Development Life Cycle (SDLC), including requirements analysis, feature design, and technical solution implementation.

Muatmuat by AZ Logistik

Jul 2025 – Oct 2025

Frontend Developer (Project Based) | Surabaya

- Developed a web application with a multi-role architecture (4 user types) using Next.js and modern styling with Tailwind CSS.
- Integrated RESTful APIs from the backend to render data dynamically and in real-time.
- Collaborated closely with the Backend and UI/UX teams to ensure high application performance, interface consistency, and a seamless User Experience (UX).

CV. Biliva Nature Indonesia

Jun 2023 – Jan 2025

IT, Fullstack Web Developer | Surabaya

- Designed and developed a custom Enterprise Resource Planning (ERP) web application utilizing the Laravel ecosystem, Blade architecture, and JavaScript libraries.
- Architected and optimized relational databases to support high-performance data transactions, ensuring reliable system uptime.
- Provided post-release technical support with a Service Level Agreement (SLA) of resolving bugs and operational issues in under 24 hours.

Elecomp Software House

Jan 2020 – Feb 2020

Internship Web Developer | Malang

- Developed functionalities and maintained client websites to ensure compatibility with the latest web technology standards.
- Conducted regular troubleshooting and bug fixing to maintain the stability and operational efficiency of client systems.

PROJECTS

Merakit — Aplikasi Manajemen Tugas & Kolaborasi

Laravel, Next.js, RESTfull API

- Developed a board-based task management system (similar to Trello) equipped with secure authentication and workflow management.
- Implemented a clean and scalable backend architecture using Laravel & Next.js, along with RESTful API integration.

Memangkas Barber App — Sistem Booking & Antrian Barbershop

Express.js, Next.js, RESTfull API, Docker

- Designed and built a centralized booking and queue management application featuring a scheduling algorithm and an interactive admin dashboard.
- Executed efficient CI/CD pipelines utilizing GitHub Actions & DockerHub to ensure optimal integration accessibility.

Ayo On Time — Sistem Manajemen Absensi

Laravel, Next.js, RESTfull API

- Developed an attendance tracking platform containing a dynamic rule engine to validate arrival status (on time, tolerance, late) based on check-in time.
- Designed a structured relational database schema for attendance report extraction and historical student tracking.

Nusantara Raya Motor POS — Sistem Kasir Modern

Laravel, React.js, Inertia, Docker

- Designed and developed a scalable mini-ERP application based on Laravel 12, React, Inertia.js, MySQL, and Docker to manage inventory, sales, purchases, POS, and business operations.
- Implemented a Service Layer, Database Transactions, and Role-Based Access Control (RBAC) using Spatie Laravel Permission to ensure maintainable code, data consistency, and system security.

TECHNICAL SKILLS

- Frontend :** Next.js, React.js, Vue.js, Tailwind CSS
- Backend :** Laravel, NestJS, Express.js, Node.js
- Database :** PostgreSQL, MySQL, SQL
- Tools & Infra :** Docker, Git (Version Control), CI/CD
- Design :** UI/UX Design, Graphic Design
